

The Presidents Thoughts

When I were but a lad, winter started in as November brought a rush of concern for the onset of the freezing time ahead. This usually resulted in checking out the car's cooling systems specific gravity levels and amongst the fastidious the flushing out and re-filling with antifreeze.

That was then, but now with the benefit of global warming for me winter starts with the first decent fall of snow which we had recently, and it stayed with us long enough to get the snowmobile started and to thrash round the field till the two stroke fuel ran out.

The remaining arm and carrot nose have long fallen off the snowman and Christmas is behind us, but there is still time for another decent fall of snow to bring on more of the Christmas spirit.

Rosemary and I would like to wish you all a Merry Christmas and a Happy and interesting New Year.

Keep the wheels moving.

Bill
