

Rally of the Giants Blenheim 2018

This year's ROG had the benefit of this summer's extraordinary warm weather so we in the Studebaker club placed ourselves under the canopy of some of the mature trees near the show ring at the Palace of Blenheim to enjoy the event.

As always the Pre 50 club did a magnificent job of organization bringing together an eclectic mix of American automotive metal from the basic to the ostentatious , in other words there was something for everyone .

It is not always possible for our members to bring their cars for various reasons but it is still good that they came, and for some of us we possibly wished we hadn't when things don't go smoothly, but the taking of our vehicles to a common site is actually an excuse to have a pleasant get together and sample some of Ann's cakes.

It was an opportunity to catch up with like minded friends and talk with fellow vehicle owners and get an insight as to why they have the car they do and to learn something of its history plus warts and all from the ownership point of view.

This is the time of the year when we are spoilt for choice as to where we can go in our vehicles, making as it does an extra dimension to our trip and hopefully educating / entertaining other road users. With that thought in mind I will now sort myself out for next week end's event .

Keep the wheels turning

Bill Baker.
