

Peter Willis has sent photos of the 1955 Champion Sedan owned by his parents in the USA and the UK.

Outside our rented house in DC. This car took 5 of us literally all over the USA and some of Canada. In August 1956 from East to West Coast, south into Mexico and back to DC in 28 days. 9000 miles, no air conditioning.

A new car and already damaged.

The UK atomic energy attache and the South African attache should be able to fix it between them

In Pembrokeshire after returning to the UK in 1957. Amazing what that Champion engine could deal with. I'm in mum-knitted yellow and I could drive that lot, including backing up, even on Cornish roads. Not now I think. (Home built Mirror dinghy)
