

1922 Light Six Tourer for Sale.

Blue body with Black Wings. Engine 3200cc straight 6 with aluminium head.

It produces around 40 HP. Gear box 3 speed with transmission brake operated when the clutch is fully depressed. It has an original steering wheel with the hand throttle and advance retard complete and still has the original horn button.

I fitted a stainless steel exhaust copied from the original rusted one and also managed to source a set of 5 wire wheels which were an option in 1921. 4 special splined hubs were manufactured for me and the car now sits on these wire wheels complete with good tyres and tubes.

I have refurbished the brakes. I sourced a brand new starter motor from the USA (it is a Stude.1923 one). All the mechanical bits are in good order and nothing is worn out. I have replaced all the steering rod ends, king pin bushes and wheel bearings and seals when the wires were fitted

The car is very original and all the original parts are with the car including the air intake and I have fitted an air cleaner to it. There is a full set of weather panels including all the side screens and a set of headlight protector covers. I have all the original tools including the jack, starting handle, spanners, tyre pump, and a copy of the workshop manual.

I also have all the original wooden spokes wheels, tyres including 2 spare rims which are fitted with tyres, the original hubs, bearings etc. and correct aluminium hub dust caps. The tyres and tubes on the wooden wheels hold air . The car has all the original embellishments fitted as can be seen in the photos.

I also have a serious mass of spare parts

2 Engines - incomplete but
good blocks, cranks etc.,

2 Gear boxes,

1 back axle,

1 Front axle,

1 Carburettor

Electrical items

Distributor cap - new

ignition leads for magneto

Cylinder head

Bearings

Clutch parts

Cooling fan and Mounting

bearings

fan belts

drive couplings

Con rods

Pistons

Engine valves

Plus numerous other parts

both new and second hand.

The Light 6 has a UK V5 with an age related number plate which will stay with the car. It is MOT and road tax exempt.
